Office Action Summary	Application No. 10/801,360	Applicant(s) SCHLOSSER ET AL.	
	Examiner Alfred Basichas	Art Unit 3749	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2006.
 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-32 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) ☐ Claim(s) _____ is/are allowed.
 6) ☒ Claim(s) 1-32 is/are rejected.
 7) ☐ Claim(s) _____ is/are objected to.
 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
 * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 8, 14, 15, and 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Maust (6,267,113), which shows all of the claimed limitations. Maust shows, among other things, a gas fueled outdoor fireplace, comprising a fireplace housing (see at least fig. 1) having a housing structure and a plurality of legs 14 extending from the housing structure; a burner 42 connected to the fireplace housing, the burner in fluid communication with a supply of fuel 34,36,37 to provide a flame; and, a plurality of side panels 17 connected to the housing, wherein at least one of the side panels is individually removable from the housing to expose the burner, wherein a plurality of the side panels are connected to the housing without fasteners, wherein a plurality of the side panels are removable from the housing without tools, wherein the side panels are slidingly connected to the outdoor fireplace, further comprising a first handle 35 connected to the fireplace housing, wherein the handle is connected to a

Art Unit: 3749

portion of the housing structure of the fireplace housing opposing a fuel supply for the outdoor fireplace, wherein the side panels have a first flange and a second flange, the first and second flanges slidably engaging the fireplace housing to connect the side panels to the housing in the first position, wherein the side panels are slidably moveable from the first position to a second position, the side panels being individually removable from the housing in the second position to individually expose the burner.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 4, 5, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maust (6,267,113), which discloses substantially all of the claimed limitations.

Maust does not specifically recite the panel blocking the burner from view, a fixed panel, or a hinge on the hood. Nevertheless, these elements are an obvious modification based on design choice, and depends on esthetic considerations and convenience of use. While Maust discloses transparent panels, it would still be within the knowledge and ability of a skilled artisan to make a portion of the panel opaque or colored so as to make the effect more pleasing to the eye. As regards the panel being fixed, it is simply a matter of need or lack thereof for its removal. Finally, as regards a hinge on the cover, this too is well within the knowledge and ability of a skilled artisan for convenience of access to the interior of the apparatus. In view of the absence of criticality for this particular design, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate these elements into the invention disclosed by Maust, so as to provide for esthetic considerations and convenience of use.

7. Claims 6, 16, and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maust (6,267,113), which discloses substantially all of the claimed limitations. Maust does not specifically recite the claimed wheels or handles. Official

Notice is given that the use of wheels and handles is old and well known in the art. Such an arrangement has the clear and obvious benefit of providing for more convenient transport of the device. Accordingly, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate the claimed wheels and handles into the invention disclosed by Maust, so as to provide for convenient transport.

8. Claims 7 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maust (6,267,113) in view of Hussong (5,738,084), and further in view of design choice. Maust discloses substantially all of the claimed limitations, but does not specifically recite a separate valved fuel tank with hinged enclosure. Hussong teaches a fireplace with a valved fuel tank within an enclosure. This arrangement is simply a well known equivalent and alternative to the fuel system disclosed by Maust. Nevertheless, the particular design of the housing and arrangement of the fuel tank relative to the fireplace is not taught. However, such an arrangement is an obvious modification based on design choice, and depends on esthetic considerations and convenience of use. In view of the absence of criticality for this particular design, it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate these elements and the fuel arrangement of Hussong into the invention disclosed by Maust, so as to provide for esthetic considerations and convenience of use.

9. Claims 13 and 23-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maust (6,267,113) in view of Hussong (5,931,154), Wilk 6,354,831), or Shimek (5,601,073). Maust discloses substantially all of the claimed limitations, but does not

specifically recite a burner plate as claimed by applicant. Hussong, Wilk, and Shimek all teach burner plates as claimed by applicants. These arrangements are simply well known equivalents and alternatives to the burner system disclosed by Maust.

Accordingly, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the burner plate arrangements of Hussong, Wilk, and Shimek into the invention disclosed by Maust, because it is within the general skill of one of ordinary skill in the art to select a known structure on the basis of its suitability for the intended use.

Response to Arguments

10. Applicants' arguments with regard to the rejected claims, filed February 23, 2006, have been considered, but are not deemed fully persuasive.

a. With respect to claims 1-22 and 32, applicant asserts that Maust cannot perform the claimed function because Maust does not specifically recite removability. Nevertheless, applicant is advised that the claims are given their broadest most reasonable interpretation. As such, practically anything is removable. This is true even if the structure calls for permanence, such as welding or gluing. Applicant is advised to claim the structure to which the claimed function is addressed.

b. With respect to claim 17 and 23-29, applicant asserts that the addition of the term "substantially" distinguishes the claims from the prior art. The examiner

disagrees, as the term given its broadest most reasonable interpretation is satisfied by the panels of Maust.

c. With respect to claims 6, 16, and 30-32, applicant asserts to challenge the examiner's taking of Official Notice. Accordingly, Rousseau, Dunstan, Hartway, Meloy, and Carter have been cited representing a small sampling of the claimed handle and wheel arrangement. Applicant is advised to remember that the standard for analogousness may be based on the problem with which the skilled artisan is faced with. In this case it is the portability and stability of the device.

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alfred Basichas whose telephone number is 571 272

Art Unit: 3749

4871. The examiner can normally be reached on Monday through Friday during regular business hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ehud Gartenberg can be reached on 571 272 4828. The fax phone numbers for the organization where this application or proceeding is assigned are 703 872 9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Tech Center telephone number is 571 272 3700.
